

Clock in from anywhere – local or remote!

Time & Access Systems' TA Mobile Clock can record employee times, track labour distribution, and allow entry of other source data in a multitude of industries including home health care, construction, delivery services, and many other businesses where employees are mobile.

TA Mobile Clock uses the Time in Attendance Management Software database in Enterprise Version to program its functionality.

TA Mobile Clock gives you the option of entering transactions as an employee or as a supervisor (i.e.: clocking in a group of employees).

FEATURES...

- Eliminates the unavoidable errors associated with manually collected data
- Features easy operation
- Provides accurate, reliable data
- Runs on your existing iPhone, iPad, Android, Windows phones and Tablets
- Reduces installation costs
- Employees can collect time and job data from any remote location
- Saves money over conventional time clocks
- Links/synchs directly to your Time in Attendance Management software
- Supervisor mode for group clocking

TA Mobile Clock functions as a simple to use data collection point for employee information, that can complement the management information systems you already have in place. A convenient Supervisor Mode allows supervisors to select from a list of their employees, for performing group transactions. TA Mobile Clock runs on any portable device that utilizes 3G SIM. By automating your data collection process, you can eliminate the manpower and mistakes associated with conventional time sheets, thereby reducing both payroll costs and errors.

TA Mobile Clock guarantees accurate, reliable input. Employees simply enter information through the keypad or touch screen. TA Mobile Clock collects this data and transfers it to your computer, so data is accurate and up-to-the-minute in your office.

Put the power of automated data collection to use in your business!

What kind of data would you like to collect? Keeping track of employees' time on various jobs and accurate accounting of their worked time is essential in determining productivity. TA Mobile Clock provides an easy and cost effective means of gathering this type of data. If the data you are after can be entered through a keypad, TA Mobile Clock can time stamp it, record it, and feed it to your computer.

The technology that will change the way your team work.
